Design System

- I. Palette
 - Color Scheme

Role	Hex	Used For
Primary	#AE3C00	Main buttons, important actions, active states
onPrimary	#FFFFFF	Text and icons placed on Primary
Secondary	#E47526	Highlights, icons, secondary emphasis
onSecondary	#290E07	Text/icons placed on Secondary
Surface	#FDF8EF	Main app background
Surface Container	#FFFFFF	Cards, dialogs, input areas
Primary Text	#000000	Main menu text, headings, and important information
Secondary Text	#666666	Search text, supporting text, descriptions, and secondary information
onSurface	#290E07	Main body text
Navigation Text	#726C6C	Inactive bottom navigation icons and labels
Error	#D32F2F	Validation errors and destructive/error states
onError	#FFFFFF	Text/icons on Error

Table 1.1. Color Scheme Table

```
3 final tableTapColorScheme = ColorScheme.fromSeed(  
4   seedColor: const Color(0xFFAE3C00),  
5   brightness: Brightness.light,  
6 ).copyWith(  
7   primary: const Color(0xFFAE3C00),  
8   onPrimary: const Color(0xFFFFFFFF),  
9   secondary: const Color(0xFFE47526),  
10  onSecondary: const Color(0xFF290E07),  
11  surface: const Color(0xFFFD8EF),  
12  onSurface: const Color(0xFF290E07),  
13  error: const Color(0xFFD32F2F),  
14  onError: const Color(0xFFFFFFFF),  
15 );  
16  
17 class AppColors {  
18   static const surfaceContainer = Color(0xFFFFFFFF);  
19  
20   static const primaryText = Color(0xFF000000);  
21   static const secondaryText = Color(0xFF666666);  
22   static const navigationText = Color(0xFF726C6C);  
23 }
```

Figure 1.1. Color Scheme as FlutterCode

- Order Status Colors

Status	Recommended color	Purpose
Received / New	#FB5154	Newly received orders
Preparing	#ECB716	Orders currently being prepared
Ready	#29A500	Orders ready for pickup
Completed	#62920A	Picked-up/completed orders
Inactive	#BDBDBD	Future/inactive progress steps

Table 1.2. Order Status Colors Table

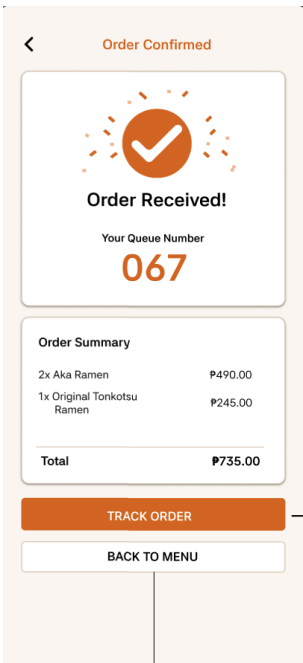

```
1 class AppStatusColors {
2   static const received = Color(0xFFFFB5154);
3   static const preparing = Color(0xFFECB716);
4   static const ready = Color(0xFF29A500);
5   static const completed = Color(0xFF62920A);
6   static const inactive = Color(0xFFBDBDBD);
7 }
```

Figure 1.2. Order Status Colors as Flutter Code

● Contrast Check

- 1) **Body Text #290E07 on Background #FDF8EF**
Contrast Ratio: 17.11:1
Result: **Pass AAA**
- 2) **White Text #FFFFFF on Primary #AE3C00**
Contrast Ratio: 6.09:1
Result: **Pass AA**
- 3) **Dark Text #290E07 on Secondary #E47526**
Contrast Ratio: 5.92:1
Result: **Pass AA**
- 4) **Secondary Text #666666 on Background #FDF8EF**
Contrast Ratio: 5.43:1
Result: **Pass AA**
- 5) **Navigation Text #726C6C on Background #FDF8EF**
Contrast Ratio: 4.87:1
Result: **Pass AA**

● Dark Mode Decision

TableTap will use a light-only theme for the current prototype. The mockup was designed around a warm light background, white cards, and strong status colors, so adding a second dark color scheme would increase the implementation and testing scope without supporting a core feature of the prototype.

II. Type Scale

- Font Family

42dot Sans

Style	Flutter Slot	Size	Weight	Used For
Display	displaySmall	48sp	Bold / w700	Main queue number, such as 067
Display Medium	headlineMedium	36sp	Bold / w700	Numbers in New Orders, Preparing, and Ready
Heading	headlineSmall	24sp	Bold / w700	Welcome headings, major page headings
Title	titleMedium	18sp	SemiBold / w600	Screen titles, section headings
Body Large	bodyLarge	16sp	SemiBold / w600	Ordered Items, Customer Notes, order details, and general text
Body Medium	bodyMedium	14sp	Regular / w400	Supporting text, secondary order information, descriptions, and smaller content
Caption	labelSmall	12sp	Regular / w400	Hints, secondary details, small labels

Table 2.1. Font Family Table

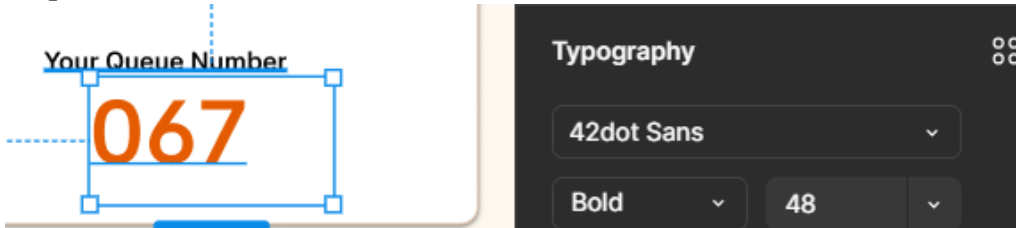

```
25 const tableTapTextTheme = TextTheme(  
26   displaySmall: TextStyle(  
27     fontSize: 48,  
28     fontWeight: FontWeight.w700,  
29     color: AppColors.primaryText,  
30   ),  
31  
32   headlineMedium: TextStyle(  
33     fontSize: 36,  
34     fontWeight: FontWeight.w700,  
35     color: AppColors.primaryText,  
36   ),  
37  
38   headlineSmall: TextStyle(  
39     fontSize: 24,  
40     fontWeight: FontWeight.w700,  
41     color: AppColors.primaryText,  
42   ),  
43  
44   titleMedium: TextStyle(  
45     fontSize: 18,  
46     fontWeight: FontWeight.w600,  
47     color: AppColors.primaryText,  
48   ),  
49  
50   bodyLarge: TextStyle(  
51     fontSize: 16,  
52     fontWeight: FontWeight.w600,  
53     color: Color(0xFF290E07),  
54   ),  
55  
56   bodyMedium: TextStyle(  
57     fontSize: 14,  
58     fontWeight: FontWeight.w400,  
59     color: AppColors.secondaryText,  
60   ),  
61  
62   labelSmall: TextStyle(  
63     fontSize: 12,  
64     fontWeight: FontWeight.w400,  
65     color: AppColors.secondaryText,  
66   ),  
67 );
```

• Visual Samples

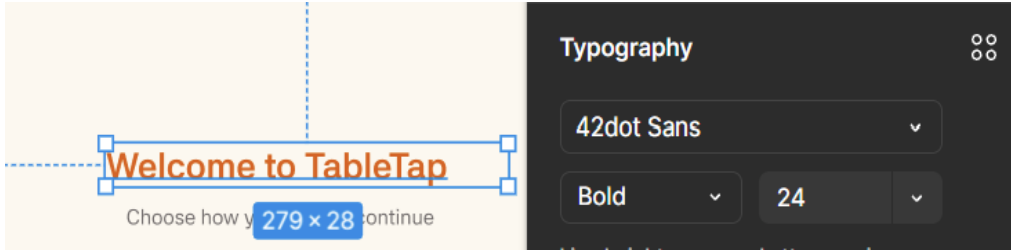

48sp Bold:

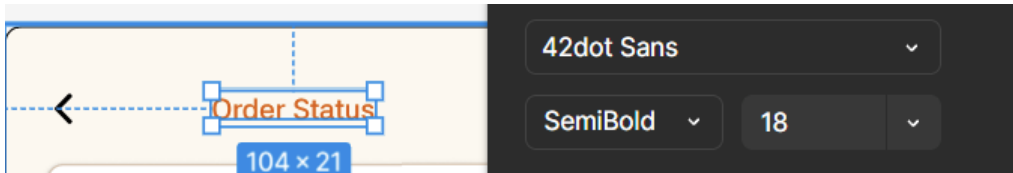

36sp Bold:

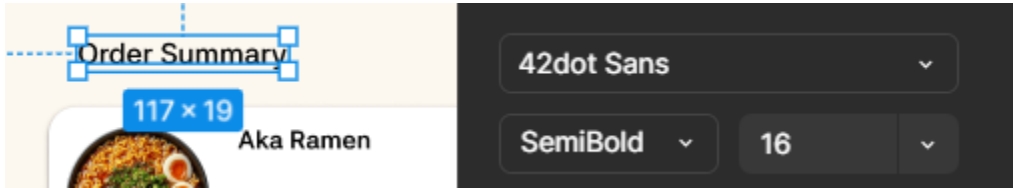

24sp Bold:

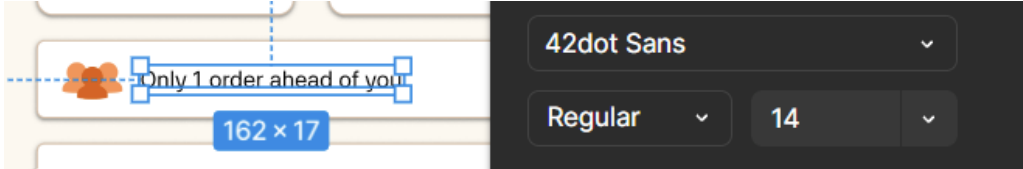

18sp SemiBold:

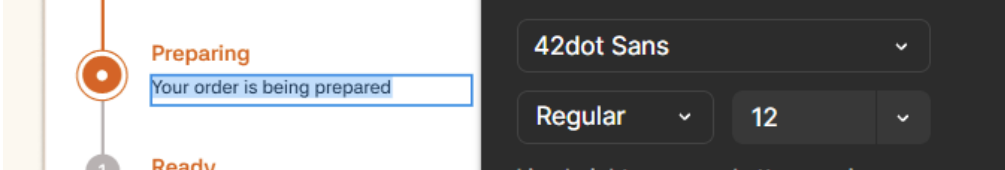

16sp SemiBold:

14sp Regular:

12sp Regular:

```
85 final tableTapTheme = ThemeData(  
86   useMaterial3: true,  
87   fontFamily: '42dotSans',  
88   colorScheme: tableTapColorScheme,  
89   scaffoldBackgroundColor: const Color(0xFFFD8EF),  
90   textTheme: tableTapTextTheme,  
91  
92   cardTheme: const CardThemeData(  
93     color: AppColors.surfaceContainer,  
94     margin: EdgeInsets.all(AppSpacing.sm),  
95   ),  
96  
97   filledButtonTheme: FilledButtonThemeData(  
98     style: FilledButton.styleFrom(  
99       minimumSize: const Size.fromHeight(48),  
100     ),  
101   ),  
102 );
```

Figure 2.2. Text Theme as Flutter Code

III. Spacing

- Spacing Scale

Token	Value	Typical Use
xs	4px	Very small internal gaps
sm	8px	Icons and closely related elements
md	16px	Card padding and list-item gaps
lg	24px	Screen edge padding and section gaps
xl	32px	Large layout separation

Table 3.1. Spacing Scale Table

```
1 class AppSpacing {  
2   static const double xs = 4;  
3   static const double sm = 8;  
4   static const double md = 16;  
5   static const double lg = 24;  
6   static const double xl = 32;  
7 }
```

Figure 3.1. Spacing Scale as Dart Code

IV. Components

Component	File Path	Constructor Parameters	Appears On
App Header	lib/widgets/app_header.dart	String title, bool showBack, VoidCallback? onBack	QR Scanner, Cart, Order Confirmation, Order Status, Staff Login, Order Details, History
Primary Button	lib/widgets/primary_button.dart	String label, VoidCallback? onPressed	QR Scanner, Cart, Order Confirmation, Staff Login, Order Details, Order Completed
Secondary Button	lib/widgets/secondary_button.dart	String label, VoidCallback? onPressed	Order Confirmation, Customer Order Completed
Order Item Row	lib/widgets/order_item_row.dart	OrderItem item, bool editable, VoidCallback? onAdd, VoidCallback? onRemove	View Cart, Order Confirmation, Order Details
Queue Number Card	lib/widgets/queue_number_card.dart	String label, int queueNumber	Order Confirmation, Order Status, Customer Order Completed
Order Progress	lib/widgets/order_progress.dart	OrderStatus currentStatus	Customer Order Status, Staff Order Details
Order Card	lib/widgets/order_card.dart	Order order, VoidCallback onTap, bool showStatus	Incoming Orders Dashboard, History
Bottom Navigation	lib/widgets/app_bottom_nav.dart	UserRole role, int currentIndex, ValueChanged<int> onTap	Customer Menu/Cart/Status, Staff Dashboard/History
Section Title	lib/widgets/section_title.dart	String title	Cart, Order Status, Order Details

Table 4.1. Tabled components as files

V. Assembled Theme File

theme.dart • main.dart

lib > theme.dart > [e] tableTapColorScheme

```
1 import 'package:flutter/material.dart';
2
3 const tableTapColorScheme = ColorScheme(
4   brightness: Brightness.light,
5   primary: Color(0xFFAE3C00),
6   onPrimary: Color(0xFFFFFFFF),
7   secondary: Color(0xFFE47526),
8   onSecondary: Color(0xFF290E07),
9   surface: Color(0xFFFD8EF),
10  onSurface: Color(0xFF290E07),
11  error: Color(0xFFD32F2F),
12  onError: Color(0xFFFFFFFF),
13 ); // ColorScheme
14
15 const tableTapTextTheme = TextTheme(
16   headlineSmall: TextStyle(
17     fontSize: 24,
18     fontWeight: FontWeight.w700,
19   ), // TextStyle
20   titleMedium: TextStyle(
21     fontSize: 18,
22     fontWeight: FontWeight.w600,
23   ), // TextStyle
24   bodyMedium: TextStyle(
25     fontSize: 16,
26     fontWeight: FontWeight.w400,
27   ), // TextStyle
28   labelSmall: TextStyle(
29     fontSize: 12,
30     fontWeight: FontWeight.w400,
31   ), // TextStyle
32 ); // TextTheme
```

```
34 class AppSpacing {
35   static const double xs = 4;
36   static const double sm = 8;
37   static const double md = 16;
38   static const double lg = 24;
39   static const double xl = 32;
40 }
41
42 class AppStatusColors {
43   static const received = Color(0xFFB5154);
44   static const preparing = Color(0xFFECB716);
45   static const ready = Color(0xFF29A500);
46   static const completed = Color(0xFF62920A);
47   static const inactive = Color(0xFFBDBDBD);
48 }
49
50 final tableTapTheme = ThemeData(
51   useMaterial3: true,
52   fontFamily: '42dotSans',
53   colorScheme: tableTapColorScheme,
54   scaffoldBackgroundColor: const Color(0xFFFD8EF),
55   textTheme: tableTapTextTheme,
56
57   cardTheme: const CardThemeData(
58     color: Colors.white,
59     margin: EdgeInsets.all(AppSpacing.sm),
60   ), // CardThemeData
61
62   filledButtonTheme: FilledButtonThemeData(
63     style: FilledButton.styleFrom(
64       minimumSize: const Size.fromHeight(48),
65     ),
66   ), // FilledButtonThemeData
```

Figure 5.1. TableTap Color Theme as Dart Code

VI. What Changed and Why

Element	Prelim Said	Now Says	Why It Changed
Palette	Colors were selected mainly as individual brand colors.	Colors now have named Flutter ColorScheme roles, with separate semantic order-status colors.	In m4a3 , we learned that defining colors through the app theme is easier to maintain than styling individual widgets separately.
Background / Surface	Mainly white background.	Warm #FDF8EF surface with white cards.	Building the final mockup showed that the warm background creates clearer separation between the page and its white content cards.
Typography	Heading, body and caption sizes were listed as visual rules.	Seven text styles now map directly to Flutter TextTheme slots, ranging from displaySmall for queue numbers to labelSmall for captions and smaller details.	m4a3 showed us that named theme styles can be reused instead of repeating TextStyle values throughout the app.
Spacing	We used general values such as 8px, 16px and 24px.	Spacing is now defined through reusable constants from a 4px base unit.	While building layouts in m4a4 , repeated padding and gaps showed why consistent spacing values are easier to control than individual numbers.
Components	Components were identified mainly from their visual appearance.	Repeated UI pieces now have .dart file paths and constructor parameters.	In m5a5 , working with lists, navigation and reusable data made it clearer that a widget should receive the data and callbacks it needs instead of owning the screen's state.
Order Progress	Customer and staff status displays were treated separately.	Both sides use one reusable OrderProgress component based on OrderStatus.	The final mockup showed that both customer and staff views use the same Received → Preparing → Ready → Picked Up lifecycle.
Dark Mode	Not explicitly decided.	Light only for the current prototype.	The final mockup is built around warm light surfaces, and supporting another full theme would add work without improving the prototype's core customer/staff demonstration.

Table 6.1. Table of Changes
